

ANALOGUE ADVANTAGE

BLOCK AMP BY GLOW DESIGN

The designer of the Block, Mateusz Głowka, has taken full advantage of affordable vacuum tubes to make this audiophile-grade amp. The tubes, sourced from Slovenia, provide only a modest 5W per channel, but that's enough to power home hi-fi speakers and create an authentic and appealing analogue sound. *Due late 2013*
£1,500 glow-design.pl

The vacuum tubes provide steady power and a warm sound

Stainless-steel sheets 2mm thick help filter electrical interference

Power transformers make this metal amp weigh a hefty 14kg
